Bug Holt 2018

Holt Hall has always been an excellent place for minibeast hunting. To help celebrate Holt Hall's 70<sup>th</sup> year providing education, hunt for minibeasts outside or make or draw a minibeast inside, and send us a photo.

- Don't pick up minibeasts with your hands.
- Pick up the thing that they're standing on or use the soft end of a paint brush to encourage them into a container.
- Look underneath logs and stone and be sure to put the log or stone back just as it was.
- When you have finished looking at your minibeasts, make sure you put them back where you found them.
- Make sure your minibeasts are safe and you are safe.
