

There are lots of great things you can do to find out more about Dandelions. Here are a few ideas:

A simple food web

Find out how a Dandelion fits into a food chain
What might like to eat a Dandelion and which parts do they eat?

Make a dandelion life cycle

Have a Dandelion seed head race

Drop two of the tiny seed parachutes at the same time.

Sit quietly and enjoy being in nature for a few moments

Notice which other creatures are enjoying the space you are in. Listen to the sounds, smells and notice how you feel.

Cook with them

The leaves, roots and flowers are all edible and contain lots of nutrients. Make sure you collect them from somewhere that is not polluted and a trusted adult says it is ok for you to try them. Craft Invaders have a great recipe for Dandelion and lemon biscuits on their website.
