

Shakers

Shakers can be made using any container with a secure lid. Try different sizes and materials such as wood, metal, cardboard, plastic (avoid glass). Fill with dry grains or pulses such as lentils, rice, chick peas, raw popcorn.

Connect your music maker to the environment that made it.

Decorate your shaker with information about the plant that grew the grain or pulse.

What does a lentil plant look like? What part of a plant is rice? Where do chick peas grow? What does a popcorn plant look like?
